

The High Availability Company

Press Release

Libelle BusinessShadow Disaster Recovery and High Availability Solution for Use with SAP® Applications to be Demonstrated at TechEd '07

Libelle will demonstrate its BusinessShadow solution, which mirrors SAP solution-based landscapes across large distances with a built-in time-delay. With BusinessShadow, companies can avoid downtime caused by software/user errors and site failures.

LAS VEGAS – October 3, 2007 – Libelle, a Stuttgart-based software company, announced today that it will demonstrate its BusinessShadow solution for use with SAP® applications at TechEd '07 Las Vegas, SAP's largest technical education conference. With this Disaster Recovery and High Availability solution, SAP application-based landscapes can be mirrored time-delayed, so companies are protected from unplanned downtime. Due to the small need of network bandwidth, data can be mirrored over any distance to a different location. BusinessShadow complements existing technologies for use with SAP applications such as Storage Area Networks, Snapshot-methods or Clusters since these approaches won't offer complete protection from software/user errors and data corruption.

Libelle BusinessShadow 4.2 has achieved "Certified for SAP NetWeaver®" status for its integration with the SAP NetWeaver Application Server. Libelle bundles the products DBShadow, FSShadow and SwitchApplication. The solution is optimized for databases and file structures for SAP application-based environments and integrates smoothly with existing landscapes. Libelle BusinessShadow can also be used with MaxDB, DB2, Oracle and Microsoft SQL Server.

SAP TechEd' 07 takes place October 1-5 at the Mandalay Bay Convention Center (MBCC) in Las Vegas. Libelle will exhibit with its sister company Aivant L.P., representing Libelle's business in the United States.

About Libelle:

Libelle has been established as a specialized software company for High Availability and Disaster Recovery since 1994. The company is based in Stuttgart. Over 300 large- and medium sized companies trust Libelle and its software solutions with the security and recovery of their important data. The core product is **BusinessShadow**[®] - data mirroring for databases and file systems, as well as automated application fail over. Here, clients profit from one-source-service because support, sales, and software-development all take place at Libelle's Stuttgart location.

Because of the large sales network of partners, Libelle is well positioned internationally. Over 1,000 installations prove the experience and capacity of the company. In addition, Libelle maintains intensive partnerships with all relevant hardware and software developers.
